The page content is an academic abstract from the American Journal of Human Biology. At the top, it says "Статья найдена в библиотеке Либген <http://lib.gen.in/next/MTAuMTAwMi9hamhILjExMzc=/al-kandari2002.pdf>". Below this, the journal title "AMERICAN JOURNAL OF HUMAN BIOLOGY 14:1–8 (2002)" is centered. The main title of the article is "Length of Marriage and Its Effect on Spousal Concordance in Kuwait". The authors listed are YAGOUB AL-KANDARI,¹ DOUGLAS E. CREWS,^{2,3*} AND FRANK E. POIRIER². The affiliations are given as ¹Department of Sociology, Social Work, and Anthropology, Kuwait University, Kuwait; ²Department of Anthropology, The Ohio State University, Columbus, Ohio; and ³School of Public Health, The Ohio State University, Columbus, Ohio. The abstract discusses the hypothesis that marriage duration affects physical and cultural homogamy and spousal concordance in Kuwaiti marriages, noting the impact of Westernization and the examination of spousal similarities for selected traits across different marriage durations (15 years or less, 16 to 30 years, and 31 years and more). Consanguineous couples belonging to the al-Kandari clan are mentioned as one of the largest and most

ABSTRACT It was hypothesized that marriage duration affects physical and cultural homogamy and spousal concordance in Kuwaiti marriages. Westernization increased spousal correlations due to fewer arranged marriages and increased individual spousal choice. Spousal similarities for selected physical and cultural traits were also examined for couples married 15 years or less, 16 to 30 years, and 31 years and more. Consanguineous couples belong to the al-Kandari, one of the largest and most
